Description

The T74L1G08 is a single 2-input AND gate with V_{CC} supply from 1.65 V to 5.5 V. Schmitt-Trigger action with slower rise-and-fall times and better noise immunity. I_{OFF} circuits can prevent backflow current during power-down, thus supporting partial power-down protection.

The T74L1G08 is available in SOT353 and SOT23-5 packages and is characterized from -40°C to 125°C.
